PROFILE / ABOUT ME

Vocational high school student majoring in Software and Game Development at SMK Wikrama Bogor with an interest in web development and backend systems. Experienced in developing web applications using PHP, Laravel, JavaScript, Express.js, PostgreSQL, and MySQL through school and personal projects. Active in music and competitions as a vocalist with several achievements in band competitions and FLS3N at the city level. Able to work in teams, communicate confidently, and adapt quickly in collaborative environments.

PROJECTS

Clinic Management Website

- Developed a clinic management website using Laravel with CRUD features and database integration.

Inventory Management API

- Built a simple inventory API using Express.js for item management and backend practice.

Concert Ticket Landing Page

- Created a simple concert ticket booking web page using PHP.

BMI Calculator Website

- Developed a basic BMI calculator website using PHP.

Flutter UI Slicing

- Converted Figma designs into Flutter user interfaces.

English Dictionary Website

- Developed an interactive English dictionary website using React.js and public API integration to display word meanings, pronunciation, and definitions dynamically.
